

Calculating Silica Gel requirements

1. Measure Sealed Chamber Volume

Key to calculating your silica gel requirements is isolating the dimensions of the **enclosed chamber**.

Depth = 8cm
Width = 14cm
Length = 26cm

2. Calculate Silica Gel needs

Silica Gel Calculation				
Silica Gel	=	Package Dimensions (cm): (Length x Width x Depth)	x	1.5
	=	(26 x 14 x 8)	x	1.5
Silica Gel	=	4.368		

3. Understand the results

4 x 1g Silica Gel sachet OR
2 x 2g Silica Gel sachet OR
1 x 5g Silica Gel sachet
