### Important safety notes

1. Ensure that battery and inflator are properly connected before each use.
2. Before operating, check your battery level.
3. Disconnect the battery and turn off LED light when inflator is not in use.
4. Do not operate your inflator in rainy environment.
5. The air vents must never be blocked during inflating.
6. In order to avoid short-circuiting and burning the circuit board, please turn off the red switch on the handle before replacing the battery.
